

As a result of the impressive development of Asian countries, the modern and contemporary art market has become an essential component of Asian economies. Half of major places for art sales are located in Asia. For a better knowledge of Asian contemporary art market, we created this medium as an open platform of recognition of Asian contemporary art market. To date, we have selected more than 140 artists, renowned both in Asia and worldwide. We chose their more significant works to illustrate their artistic careers. We sought to establish the characteristics and talents that the booming Asian contemporary art market is revealing. We follow the evolution of these artists, associated with the economic and artistic context of countries in which they are developing but we also place a spotlight on new artists that the artistic boom makes us discover. If you want to help highlight these important players on the contemporary creation scene, please do not hesitate to inform us of an event, an exhibition, other news about these artists.
